947 Church St Apt. 1
San Francisco, CA

## Profile

I develop web apps, I am passionate about coding and solving problems. Before becoming a software engineer I used to work with people. As a former psychologist I am experienced in human relationships, groups dynamics and mental health. I believe that the right interaction between people is what make things awesome.

## RECENT EXPERIENCE

**Code for America 2015-presentFull Stack**                    **Developer San Francisco, CA**

I worked with the government of West Sacramento to empower citizen urban farmers with technology.

Alongside a designer and a developer, our team conducted research in the community to develop 3 web applications. Our applications Acres and Farmer's raised awareness about the opportunities for current and aspiring farmers to start growing food in the city. For Farmer's I was responsible for the full-stack development, and on Acres I did the design and front-end development.

i-comm tech 2013-2015

Front End Developer San Francisco, CA

At i-comm I served in 2 capacities: I was the sole designer and front-end developer, as well as an ambassador for the company in the local tech scene.

I attended client pitch meetings and prototyped, then built applications for their needs. Additionally, I worked with the company's CEO to establish the first maker-coworking space in Puerto Rico (Engine 4), turning unused office space into a daily hub for makers and technologists.

## RECENT EXPERIENCE

**BrainStrong, Inc 2013-2014**                    **Psychologist and Technology Coach Santa Isabel, PR**

I designed workshops for teachers in low-income public schools to help them better understand and implement technology in the classroom.

**Puerto Rico Health Department 2008-2013**                    **Clinical Psychologist Bayamón, PR**

I lead a multidisciplinary team of health professionals to evaluate and give treatment to mental health patients.
